

Aquamaster Pearl

Who needs an Aquamaster Pearl?

The Aquamaster Pearl is a mid-range water filter, offering the user 5 micron level water filtration.

About our water filters

The Aquamaster Pearl delivers a high level of filtration, offering peace of mind that any contaminants are removed and water will taste fresh and pure.

Detailed information on the filter cartridge itself is as follows:-

Media used: Silver impregnated granular activated carbon, inside a 5µM ceramic cartridge casing including 'Scalex' limescale control.

Properties: Activated silver impregnated carbon kills bacteria, also eliminates 75-85% THM's, 95% of Herbicides and Insecticides, 90-95% of Solvents, PAH's, Turbidity, taste and odour contamination, including chlorine. Silver replaces chlorine as a disinfectant. With added WRc approved 'Scalex' food grade polyphosphate, which interacts with calcium and magnesium salts to interfere with crystal growth, reducing scale. Also provides corrosion protection.

How can it save money?

Bottled water is one alternative to filtered water. With Aquamaster Pearl filter cartridges filtering 6000 litres of water per 6 months, this gives an approximate cost of 0.4pence per litre over one year. Even the most economic bottled water can't compete with that. The environment also benefits with less plastic bottles being made and disposed of.

What results can I expect?

Tea will be better tasting without 'scummy' traces on the surface. Taste of water will improve and odour will diminish. You can be more confident in the health of the water, with bacteria and sediments filtered out.

How long does each filter last?

Each filter will keep filtering your drinking water for 3000 to 5000 litres. UK water byelaws say that cartridges should be changed every 6 months to maintain the health of the water passing through. This is the industry recognised average lifespan. Salamander operate a free reminder service to prompt you to change the filter.

Can I fit it myself?

Yes, Aquamaster Pearl is simple to fit, it can be DIY fitted without the need to hire a plumber. For full fitting instructions, please view the 'Easy to fit' PDF. Aquamaster Pearl comes with all the necessary parts but you will need to be able to drill a hole in the work surface where the filter tap will be fitted.

How simple is it to refill?

Aquamaster Pearl is very simple to refill with no expertise needed. For refilling instructions, please view the 'Easy to fit' PDF. Refills can be bought on the website.

Other useful products

For more advanced filtration needs consider using the Aquamaster Diamond. The Aquamaster Diamond has a range of different filters available to fit it, offering the user a wide choice of water filtering options to suit individual circumstances.

For more basic filtration needs consider using the Aquamaster Mini, a simple to fit, inline water filter with a smaller tap.

A range of spare parts for all Aquamaster filters are available to buy on the website.
