

## AQUA-care

### Why do I need household protection against limescale?

Salamander's AQUA-care is especially designed for households, which want to stop scale formation throughout the house. Scale on heating elements, in shower heads, in appliances and in pipework can lead to increases in energy costs and more maintenance. E.g. a 10mm build up of scale on a heat exchanger can increase your fuel usage by 50%. Eventually appliances breakdown and need repairing or replacing.

### Features

- Gives a controlled dose in proportion to the water flow
- EEC compliant using safe food grade polyphosphate
- Easy to fit
- Cartridge is easily replaceable
- Water remains treated once it has gone through the AQUA-care
- Replaceable filter lasts 6 months
- Clear plastic housing

### Benefits

- Gives protection for the whole house against limescale build up
- Eliminates the need for de-scaling appliances individually
- Water is completely safe, tasteless, odourless and colourless when it has been treated
